## **DETAILED ACTION**

1. Claims 1-118 are pending in this Office Action.

### ***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-35, 46-78 and 89-118 are drawn to a repository of class and relation definitions in a plurality of ontology server computer classified in class 707, subclass 10.
- II. Claims 36-45 and 79-88 are drawn to embedding an XML schema within a repository of class and relation definition classified in class 715, subclass 513.

3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, a repository of class and relation definitions in a plurality of ontology server computer in invention I can be used to queries information relating to class and relation definitions via a computer network. Embedding an XML schema within a repository of class and relation definition in invention II can be used in converting the XML schema into class and relation definitions See MPEP § 806.05(d).

4. The inventions are distinct, each from the other because of the following reasons:

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).
